## Automann adds IHI Turbochargers

Since 1853, IHI has become a world wide leader in technology, innovation, design, and performance based engineering components. IHI supplies a wide range of turbochargers from small ones for automobile and truck engines to large ones for land and marine power generators. IHI turbochargers are found on Isuzu, GMC, Ford, Chrysler, and Hino engines.

Based out of Tokyo Japan, IHI has produced more than 100 million turbochargers for automobiles, delivery vans, and commercial trucks in the USA, Japan, Europe, and China markets, and are growing business worldwide.

IHI turbochargers are designed with optimum bearing stability, oil seal performance, and thermal resistance in conjunction with strict quality control, to ensure high reliability and field life. Use of advanced aerodynamic design for turbine and compressor wheels along with minimized mechanical loss and low inertia also generates superior performance.

All images, related parts and interchanges are loaded on Automann.com.
